[LinkedIn](#) [Github](#) [Portafolio](#)

Full Stack Developer with a strong frontend focus and professional experience developing products and websites with React, Next.js, and TypeScript. Autonomous in implementing interfaces, integrations, authentication, analytics, performance, and deployments. Backend involvement when required by the project, with experience in Node.js, Express, SQL, and PostgreSQL.

TECNOLOGÍAS

Frontend: React, Next.js, TypeScript, JavaScript, Redux, Tailwind CSS, Sass, Astro, HTML, CSS, ECharts, ApexCharts. Backend: Node.js, Express, PostgreSQL, SQL, Prisma, Sequelize, NextAuth/Auth.js, Strapi. Tools: Vercel, Sentry, Google Analytics, Mailchimp, Figma, Docker, Git/GitHub, Azure (basic), Poetry. Mobile: React Native, Expo, Kotlin, Jetpack Compose, Hilt, Retrofit, Firebase, OneSignal. AI: Codex and ChatGPT for research, debugging, refactoring, and implementation assistance, with human review.

PROJECTS AND EXPERIENCE

Full Stack Developer - Wildcat Media Apr 24 - Present

Wildcat Media

- Development and maintenance of applications, internal platforms, and product-oriented websites, with a focus on React, Next.js, and TypeScript.
- Implementation of responsive interfaces and reusable components based on designs, requirements, and wireframes.
- Authentication with NextAuth/Auth.js, integration of APIs and external services, and backend involvement according to project needs.
- For approximately three months, I also took on backend responsibilities due to the absence of a dedicated backend developer.
- Management of deployments, environment variables, domains, builds, logs, and production debugging on Vercel.
- Implementation of Google Analytics, Mailchimp, and tracking tools on landing pages and event websites.

- Django quotation system: quotation workflows, roles, approval statuses, and PDF generation.

Technologies: React, Next.js, TypeScript, JavaScript, Redux, Node.js, NextAuth/Auth.js, Astro, Vercel, PostgreSQL, Sass, Tailwind CSS, Sentry, Google Analytics, Mailchimp, Docker.

Main Projects at Wildcat Media

- **eDays:** event websites built with Astro, responsive design, components, analytics/marketing, and Vercel.
- **SVANT:** React, Redux, ECharts, ApexCharts, Sass, and monitoring with Sentry.
- **Quanta:** Tailwind CSS, HTML, and Poetry-based tools.
- **Proshale:** React/Vite and content/blog integration with Strapi.
- **Stak and Versa:** development and maintenance of web products within the team.

Full Stack / Mobile Developer - Emotionall | Professional Project

External Company

- Web and mobile development involving authentication, API integration, notifications, and user experience.
- Android features developed with Jetpack Compose, Hilt, and Retrofit; integration with Firebase and OneSignal.

Technologies: Kotlin, Jetpack Compose, Hilt, Retrofit, Firebase, OneSignal, React, REST APIs.

Full Stack Developer - Surco Feb 25 - Jun 26

Personal Project

- Design and development of a management platform for fruit growers: field operations, quality, inventory, and sales.
- Backend architecture and REST API built with Node.js, TypeScript, Express, Prisma, and PostgreSQL.
- Authentication, section/action-based permissions, validations, filtering, sorting, and pagination.
- Web interfaces and a mobile application built with React Native/Expo for operational use in the field.
- Data modeling for batches, fruits, varieties, colors, calibers, groups, boxes, inventory, and sales; deployment and environment configuration.

Technologies: TypeScript, Node.js, Express, Prisma, PostgreSQL, React/Next.js, React Native, Expo, REST APIs, Vercel, Docker

OTHER PROJECTS

Winery Software: research and functional design of a traceability platform from grapes to bottled wine.

Platform for Psychologists: product and architecture definition for a freemium marketplace with profiles, scheduling, sessions, and reviews.

PREVIOUS EXPERIENCE

Back-End Developer - NoCountry Mar 23 - Jun 23

Internship

- Backend development for a delivery application: database, orders, users, restaurants, food items, and shopping cart.

Technologies: JavaScript, Node.js, Express, PostgreSQL, Sequelize

Full Stack Web Developer - Liga Mendocina de Improvisación Oct 22 - Dec 22

LMI - Mendoza, Argentina

- Official website, independent ticketing system, content management, and frontend/backend functionality.

Technologies: React, Redux, JavaScript, Node.js, Express, PostgreSQL, Sequelize

TRAINING PROJECTS

- La Reserva - Henry Bootcamp (2022): application for a sports complex featuring search, filters, tournaments, registrations, standings, and top scorers. React, Redux, Tailwind, Node.js, Express, PostgreSQL, and Sequelize.
- Pokemon App - Henry Bootcamp (2022): full-stack application featuring search, filters, sorting, API integration, and its own data persistence. React, Redux, Node.js, Express, PostgreSQL, and Sequelize.

PROFESSIONAL EDUCATION

- Full Stack Web Developer. Henry Bootcamp. 700 hours of theoretical and practical coursework.
- Java Developer. CISCO - Learning to Program and Intermediate. 2018.
- Python. Self-taught - basic level.
- Electronic Technician specialized in Automation and Control. Escuela Ingeniero Gabriel del Mazo. 2013.

LANGUAGES

- English B2 - Upper-Intermediate. Reading technical documentation, written communication, and workplace conversation.

OTHER INFORMATION

- Actor and improviser at Liga Mendocina de Improvisación.
- Comedian.

SKILLS

- Autonomy and problem-solving.
- Adaptability, continuous learning, and teamwork.
- Product-oriented mindset, UX/UI, and attention to detail.
